NESE's Intensive TOEFL® Program

NESE's intensive TOEFL® course offers students a great deal of flexibility, allowing them to design a program ideally suited to their needs. Students can enroll in NESE's TOEFL® course for as little as one month or as for as many as 6 months. In addition, as NESE's TOEFL® course is divided into three main skill areas – grammar, listening, and reading and writing, students can concentrate on the particular sections of the TOEFL® exam that they most wish to improve. For example, a student who needs to improve his score dramatically, on all parts of the TOEFL® test, can take NESE's TOEFL® course from 9:00 am to 3:15 pm each day for 6 months while another student can take only Grammar for TOEFL® for one month. Whatever a student's goals, NESE's intensive TOEFL® course will help him reach them as quickly as possible.

Grammar for TOEFL® - 9:00 -10:30

This component of NESE's intensive course targets the grammar section of both the Institutional and CBT forms of the TOEFL® exam. In class, students receive an in-depth skill review of grammatical structures, learn advanced grammar forms, acquire test-taking techniques, and take many in-class, timed practice exams. This class also serves as an excellent and comprehensive review of advanced grammar topics.

(Completion of Level 7 or Initial Placement in Level 8 Required.)

Listening & Speaking for TOEFL® - 11:00 -12:30

This component of NESE's intensive course focuses specifically on the listening and speaking sections of the iBT Next Generation TOEFL® exam. In class, students will practice listening to dialogues and lectures, and will learn the skills required to respond to both the independent and integrated speaking portions of the exam.

(Completion of Level 7 or Initial Placement in Level 8 Required.)

Reading & Writing for TOEFL® - 1:45 -3:15

This component of NESE's intensive course focuses specifically on the reading comprehension and writing sections of the iBT Next Generation TOEFL® exam. In class, students will improve their skimming and scanning abilities, learn information recognition strategies, and acquire the writing skills necessary to complete both the independent and integrated writing portions of the exam. (Completion of Level 7 or Initial Placement in Level 8 Required.)
